Please read conditions of service and sign and date if you accept them

Conditions of service – please read carefully before you return your bat

Repair and refurbishment work usually helps extend the bat lifespan and maintain blade performance. However, the nature of the game means we are unable to guarantee the lifespan of the bat or work applied post repair.

Please do not return bat covers with your bat – we are unable to guarantee their return.

Grips and labels are subject to availability. We will substitute as closely as possible where necessary. The grade of bat cannot be changed in the labelling process. Some label styles are not suited to certain bat shapes, in which cases we will substitute or adapt as required. We are unable to offer options of labels from our stock range on 3rd party bats. However, classic labels are fitted to 3rd party bats as standard for a professional finish, unless otherwise requested.

If no fittings/grip preferences are marked we will apply a standard finish of Scuff sheet, Protec-toe and 1 grip.

We allow up to 3 grips to be fitted, however, variances in grip thickness and handle shapes/profiles means in some cases only 2 can be applied, or we may use different grips from those requested to accommodate (only 1 over sorbo)

Time scales vary but we expect to be able to complete most services inside 10-14 days from receipt. Some cracks may require several attempts to seal successfully and we have some unpredictable spikes in demand, so this is only an estimation.
