WORLD RUGBY™  
**HSBC WOMEN'S SEVENS SERIES**

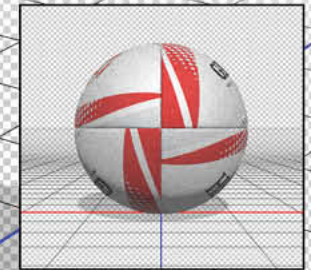

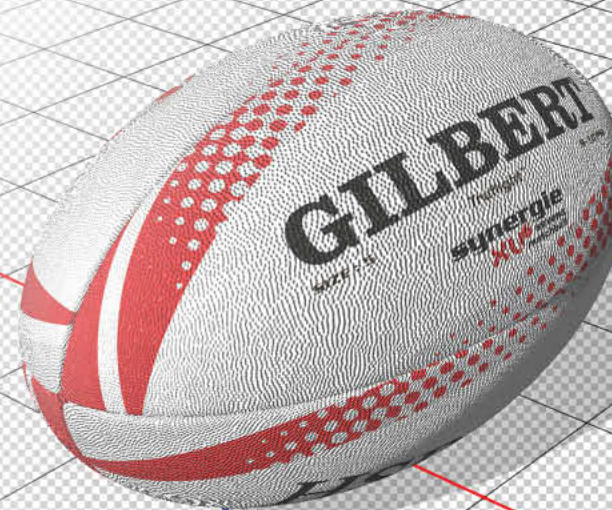

Rugby sevens is set to reach out and inspire more fans in more nations than ever before with World Rugby announcing details of an exciting new competition and commercial blueprint for its record-breaking flagship properties. Gilbert are delighted to have been selected as the Official Ball for the World Rugby HSBC Men's and Women's Sevens series for the next four years.

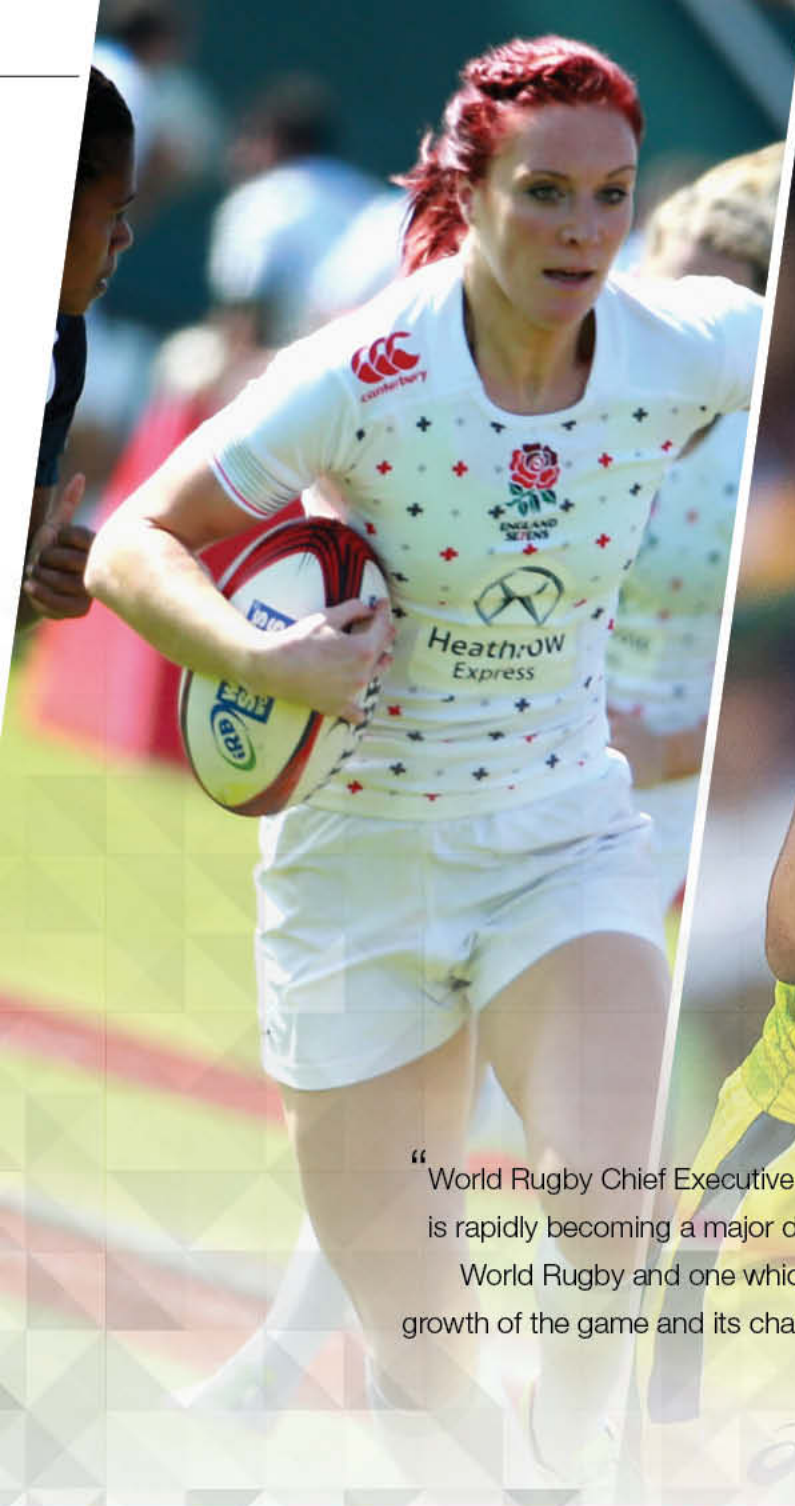

The ground breaking agreement between Gilbert and World Rugby will see the introduction of the Gilbert Synergie XV6 specialist Sevens match ball to every tournament in the Men's and Women's series, together with several other major multi sport games in 2016.

## SYNERGIE XV6

The Gilbert Synergie XV6 sevens match ball heralds yet another ground breaking development in rugby ball technology from Gilbert.

“World Rugby Chairman Bernard Lapasset said: “Rugby sevens is going from strength to strength ahead of the Rio 2016 Olympic Games and the men's and women's series have been at the heart of the global sevens success story with their winning brand of high-octane, competitive and broadcast- friendly action, global locations and festival atmosphere.”

“World Rugby Chief Executive Brett Gosper said: “Rugby sevens is experiencing record attendance, broadcast and commercial growth and is rapidly becoming a major driver of revenue for World Rugby to reinvest in the game. This schedule represents an exciting combination for World Rugby and one which we think will enable the sport to reach developing rugby markets, and therefore contribute to the continued growth of the game and its character-building values worldwide. It is great for players, great for fans and great for the ongoing prosperity and development of rugby sevens worldwide.”

# SIZE CHART

## MEASURING

### CHEST CIRCUMFERENCE (C)

Measure all the way around - taking the tape approximately 2.5 cm from pit of arm, around the fullest part of the chest. Try to keep the tape level.

### WAIST CIRCUMFERENCE (W)

Measure all the way around- taking the tape around the natural waist - (this is the narrowest part of your waist).

Try to keep your tape measure level. Our trousers and shorts are elasticated so there always plenty of room for movement here - if you are confused- Use the hip measurement.

### LOW HIP CIRCUMFERENCE (LH)

Measure all the way around - taking tape around the fullest part of the bottom. Try to keep the tape level.

### INSIDE LEG (IL)

Measure from the top of the inside leg to bottom of your heel. Please remember you can always take a trouser up if they are a little long, try turning the waistband or sewing the hem.

## GENERAL TIPS:

1. Measure yourself wearing underwear - do not measure over clothing.
2. Stand straight and keep both feet on the floor.
3. Make sure the tape measure is kept level.
4. Ask a friend to help take your measurements - (it's sometimes easier to have help).

Our ranges are designed with layering in mind. If you buy a jacket for your body size, you can be sure you will be able to fit a top and a light sweater underneath.

\*\*All measurements are an approximate guide.

Finding the perfect size isn't always easy. The fit of your clothes depends on many things, including the cut, fabric, styling and even the undergarments you are wearing! By following our body guide and how to measure guide, we hope to find you the best possible fit. It is always suggested that you measure more than once as your posture changes when you move and sometimes effects the measurement you take.
